## BURN WRAP

This **Water-Jel® Burn Wrap** offers a one-step system for emergency first aid on a burn victim. The wrap will cover a victim's limbs or torso for instant relief. Wrap is 100% worsted wool and thoroughly saturated in a cooling gel, protecting against heat and flame. Plus, it'll put out fires, stop burn progression and cool the skin. Conveniently packaged in a flat, durable pouch; easily stored on a shelf or under a vehicle seat.

## STERILE BURN DRESSINGS

**Water-Jel® Sterile Burn Dressings** ease pain, cool the burn and help protect against airborne contamination – all in one simple step. Each dressing features a non-woven polyester carrier and is pre-dressed with **Water-Jel** for immediate application.

## BURN RELIEF

Even minor burns hurt and that's why there's **Burn Jel** and **Cool Jel** from **Water-Jel®**. These thick, topical gels start cooling and soothing minor burns immediately and they also protect the injuries from infection. **Burn Jel** contains Lidocaine to draw the heat out of the wound and ease the pain.

**Cool Jel** moisturizes the injured area and is especially effective at keeping out contaminants and irritants that could delay healing. **Cool Jel** has no active ingredients.

### DID YOU KNOW?

#### Why Use Water-Jel if Water is Available?

- Water-Jel is portable and the best way to treat burns on a jobsite where water is not readily available.
- Water-Jel provides continuous, cooling pain relief. It can also be reapplied if necessary.
- Water-Jel doesn't evaporate quickly like sterile water. Where as burn sheets or dry dressings (soaked with sterile water) evaporate fast, causing immediate pain and requiring rewetting the sheets or dressings. This also can cause excessive cooling – even hypothermia.
- Water-Jel is easy to apply – on large burns or small. That's not the case using sterile water on large, serious burns. It's difficult at best.
- Studies have shown that when Water-Jel covers a burn its Tea Tree Oil, which is naturally bacteriostatic, helps prevent bacterial infection.
- Water-Jel has a long shelf life, too.

## BURN RELIEF

Stopping the progress of a burn is imperative and directly affects the outcome of the injury. That's why every first aid kit needs to have **Burn Relief** in it. It helps mitigate burns while effectively relieving the pain.

### 300 LATERAL TRANSFER SURFACE

Designed for lateral transfer and repositioning, our Transfer Surface eliminates the need for vertical lifting and saves on people power. It reduces associated back injury costs, increases productivity, and improves victim/patient dignity. It's simply the most economical way to perform comfortable transfers.

Special heat-sealed waxed surface on rugged 140 Denier Nylon material. The slick result reduces friction and makes transfers smoother. Rugged Polyester webbing handles are stitched to last. Includes tote/storage bag. Available in two sizes:  
 27" x 66" (69cm x 168cm)—Black handles  
 32" x 72" (81cm x 183cm)—Gray handles
